DETAILED ACTION

Allowable Subject Matter

1. Claims 41-43,46-48,51-53 (now renumbered 1-9) are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent Claim 41 is allowable over the prior art of record since the cited references, in particular, Winslow et al. (US 4,353,089), Wilkinson (US 5,218,486), De Mey et al. (US 6,603,820) taken alone or in combination do not teach or suggest a method of providing an improved audio reproduction derived from analog recoding comprising *deriving, without use of a prescribed tone or time-code previously applied and intended to be indicative of timing, a reference signal from within the digitized wideband playback signal, the reference signal being an extraneous artifact within the recording; adjusting timing and pitch in the digitized wideband playback signal in response to the deduced deviations, wherein such adjusting comprises establishing a change in a period of the reference signal, then conforming the timing and pitch of the digitized wideband playback signal to the modulated carrier*, in combination with the other limitations in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Yamada (US 5,748,397), Sri-Jayantha et al. (US 6,487,028); Ballard (US 5,107,377); Schwartz et al. (US 4,535,368); Pritchard (US 4,150,395); Mellows et al. (US 6,091,822); Shimizume et al. (US 5,964,380).
